

# Anti-Hail Net

Long Life | High Strength | Light Weight

## An Intro

Anti Hail Nets:- The anti hail net are the most important element of the protection system, therefore it must be made using high quality materials and realised with the best technique in order to obtain a very light but resistant and durable. Despite being black anti-hail net the most common, some fruit varieties or particular agronomic system, needs crystal nets, so to let light freely pass through it and to less influence climate conditions under the cover. The quality of the wire and raw materials Plastic monofilament is used for Knitting/weaving the anti hail net. This material is made by extrusion, melting and passing high density polyethylene (HDPE) through perforated grills (extruders). The wire is thermo-stabilised, or rather it is heated in order to reduce all retractions that plastic materials exposed to heat sources have (even moderate). Different sized diameter wires can be extruded and, consequently, it is possible to obtain materials with different resistance.

## Fruits Care Agro

Fruits Care Agro established in 2013. By now, we have a professional experience of Manufacturing, Supplying and Exporting agriculture equipments. Acquiring the strong position in the global market, we have recognized as a coveted agri Consultant and Product supplier.

We have superior Quality Anti Hail Nets.

## Physical Characteristics

	Knitting	Weaving
Polymer	HDPE 100%	HDPE 100%
Weave Shape	Tooth Sewing	Square
Weaving	Mono	Leno
Color	White	Crystal
Shade %	10-15	10-15
UV Stability	3-5	3-5
GSM	60-80	50-70

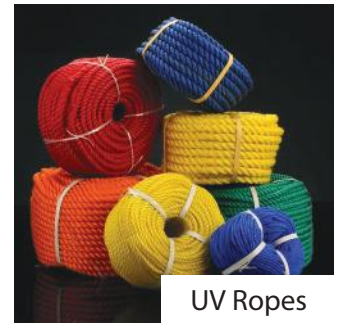

## Size(in meters)

High Density (HDP)	Full Orchard	Single Tree
3x100	8x30, 8x50	8x8
3x60	9x30, 9x50	9x9
3x30	10x30, 12x30	10x10

## Accessories

Pole Caps

UV Ropes

Clamps

Bamboo
