An Intro

Weed and Mulching Mats

Professional growers combine drip irrigation and plastic mulch to give plants what they need: warm, protected topsoil, efficient watering and a virtually weed-free environment. They get a bigger harvest with less effort. Flora-Flow All-in-One Mats now bring this proven technology to home gardeners and growers of vegetables, berries, and cut flowers. All-in-One Mats are especially easy to use. The irrigation line is bonded to the mulch, enabling installation of both at the same time. The mulch features easy tear-out 2 inch diameter planting holes every 6 inches for rapid planting at 6, 12, 18 and/or 24 inches apart. Also, plant labels printed right on the mulch produce an orderly garden without measuring. As a result, the All-in-Ones offer weed and water control, large and early harvests, and orderly plantings in one package. Installation is simple: bury or weigh down the mat edges to resist wind, connect fittings to a hose, remove planting holes and plant. The mats can be cut to length for use with connector kits or standard irrigation fittings. All mats are 4 feet wide and are available with red, black and white-on-black mulch. We sell black mats with one or two drip lines, and we sell white-on-black mats with two drip lines. Black mats promote fast heating of soil in spring and high heat through the growing season. This is a good all around mat for most plants. Choose single line mats for larger plants, or double line mats for smaller, closely spaced plants.
